Power Pack for Samsung Galaxy S4

AM503

The Power Pack for Samsung Galaxy S4 is a 3000mAh case with an integrated solar panel on the back.

The charger incorporates a powerful 3000mAh battery, enough to recharge your Galaxy S4 to 100%. It is perfectly suited for usage on your travels or just everyday use. The high efficiency SunPower® solar panel ensures fast charging in multiple sunlight conditions. The Xtorm Power Pack for Samsung Galaxy S4 can also be charged through USB or Mains[1].

This compact and easy to use Power Pack can be recharged either by solar, through the solar cell on the back or via the included USB cable. On the rim, it sports an LED battery indicator to indicate how much energy is left in the Power Pack.

You can easily slide the Samsung Galaxy S4 in the Power Pack and continue calling and using your smartphone.

In short:

- **Specially made to fit Samsung Galaxy S4**
- **Doubles the battery life of your smartphone**
- **Protective case and back-up battery in one!**

Technical specifications

Article	AM503
